EXCLUSIVE POOL CARE COLLECTION

**3 Simple Steps.
2 Complete Systems.
1 Super Result.**

CARING FOR YOUR POOL HAS NEVER BEEN EASIER

or more convenient thanks to our two complete pool care programs: **poolife® Brite Stix® System** and **poolife® MPT Extra™** Tablet System**. One makes use of new stick-based sanitizers while the other relies on traditional tablet-style sanitizers—with the same results no matter which you choose: beautiful water with exceptional clarity. So which system is best for you?

BRITE STIX®

poolife® Brite Stix® System

With this system, you now have access to a comprehensive program that doesn't just work harder, but smarter to offer long-lasting coverage for your water. Designed for multi-pool care defense and protection, the system benefits from the addition of **poolife® Brite Stix** product (Step 1). This stick-based sanitizer clarifies, prevents algae and softens your water with a controlled delivery system for brilliant protection and clarity that can last up to two weeks.

It's a brilliant idea made even better with **poolife's ClearCare Technology™** additive (CCT™), for a clear difference you can see and feel.

poolife® Brite Stix® sanitizer

Sanitize, clarify and prevent algae with this first, and most important, step in the entire system. Simply add stick(s) to your skimmer following the instructions on the label and let **poolife® Brite Stix®** sanitizer do the rest. (Sizes available: 4 lb. pail, 11 lb. pail, 21 lb. pail, 25 lb. pail & individual 8 oz. stick)

OR

poolife® MPT Extra™** tablets

Compact and convenient, these 3" tablets sanitize, prevent algae, clarify—and soften—your water. Simply add the recommended amount into your feeder or floater on a weekly basis and let the tablets do the rest. (Sizes available: 4.8 lb. pail, 21 lb. pail & 35 lb. pail)

STEP 1

MPT EXTRA™

poolife® MPT Extra™ System

A long-time favorite of loyal pool owners everywhere, the **poolife® MPT Extra™ Tablet** system makes use of the traditional tablet-based approach to sanitizing. But there's nothing ordinary about these distinctive blue-speckled tablets that produce crystal clear results in your pool with a weekly application in your feeder or floater. And don't forget the "extra" additive in the name that means soft water for your pool!

When you follow the entire system as directed, your water benefits from a multipurpose approach that chlorinates, clarifies and protects with an easy-to-follow, weekly 3-step treatment routine.

poolife® TurboShock® shock treatment

This product is used once a week to shock your pool with a powerful treatment that dissolves quickly and completely, working fast to kill algae and bacteria while destroying swimmer contaminants in your water.

STEP 2

poolife® Defend+™ algaecide

The third and final step makes use of **poolife® Defend+** algaecide, a non-foaming product that not only treats and prevents green, black and yellow algae, but also clarifies your water.

STEP 3

happy pool.
happy life.™

TRICHLOR: THE SANITIZING POWER BEHIND BOTH SYSTEMS

Trichlor is the active ingredient (93.5% to be exact!) in both **poolife® Brite Stix®** sanitizer and **poolife® MPT Extra™** tablets. Designed to dissolve slowly for continuous chlorination, trichlor-based products are considered "stabilized chlorinators" meaning they are sun-protected to extend the life of the chlorine in your water.

happy pool. happy life.™

Three simple steps. Two complete systems. One super result.

That's the promise of the **poolife® Brite Stix™ System** and the **poolife® MPT Extra™** Tablet System**. Visit your local **poolife®** dealer today to pick up the one that works best for you and start simplifying your weekly maintenance routine with the best pool care products available.
